EDUCATION

University of M'hamed Bougara — Master's Degree in Software Engineering

2025 — 2027

[Boumerdes, Algeria](#)

- Currently in progress.

University of M'hamed Bougara — Bachelor's Degree (Licence) in Computer Science specializing in system information

Sep 2022 — Jun 2025

[Boumerdes, Algeria](#)

- Graduated with Good Marks.

Lycée El Khalifa — Baccalaureate in Mathematics

2021 — 2022

[Boumerdes, Algeria](#)

- Graduated with High Honors.

EXPERIENCE

Project Manager & Co-Mentor — CNN Multi-Agent System

march – April 2026

[Club DevUp](#) — [Boumerdes, Algeria](#)

- Led a team as Project Manager in developing a multi-agent system using CNN for automated classification and organization of raw image data into structured clusters.
- Served as Co-Mentor, guiding team members through deep learning concepts and implementation challenges.
- Managed project timeline, delegated tasks, and ensured successful delivery of the intelligent data processing pipeline.

Mobile Developer & Event Organizer

Oct 2024 — November 2025.

[Club DevUp](#) — [Boumerdes, Algeria](#)

- Specialized in Android mobile development using Java for core application projects.
- Contributed to the Dev Department by developing functional components and collaborating on solution architecture.
- Led major club initiatives including the annual Open Day and technical competitions.

HACKATHONS & COMPETITIONS

InnoByte 2.0 Hackathon

May 2026

- Developed an AI-powered solution to verify medical documents and doctors' certificates for authenticity and trustworthiness.

EliteHack Hackathon

December 2025

- Built 'Allo Maison' — a multi-agent system for Elite Immobilière serving as a production line management system, automating workflows and optimizing resource allocation.

Deep Learning & Multi-Agent Bootcamp — Competition Winner

April 2026

- Intensive bootcamp covering CNN, NLP, LangGraph/LangChain multi-agent systems; won the bootcamp competition by delivering the best AI solution.

PROJECTS

Exam Scheduling Web Application

[Stack: Django · React · PostgreSQL](#)

- Built a full-stack web application to automate and manage university exam scheduling.
- Implemented features for timetable generation, room assignment, conflict detection, and student/professor notifications.
- Designed a clean, responsive UI for administrators to manage exams, rooms, and schedules efficiently.

CNN Dataset Engine

[Stack: Python · CNN · LangGraph](#)

- Built a multi-agent pipeline for automated image and video analysis, combining segmentation, clustering, and visual content understanding to transform raw media into structured, organized datasets.

Cardiovascular Disease Prediction

[Stack: Python · Scikit-learn · SVM · ANN](#)

- Built a predictive model using SVM and ANN to detect cardiovascular diseases from medical data, achieving high accuracy in early disease detection.

Desktop Password Manager

Stack: Python · CustomTkinter · Nextcloud

- Engineered a secure, cross-platform password manager with Nextcloud integration for seamless data synchronization across devices.
- Developed a complementary browser extension to provide end-to-end credential management.

Forest Cover Detection

Stack: Python · Scikit-learn · Decision Tree · Random Forest · XGBoost

- Developed an ML solution for automated detection and classification of forest cover types from satellite imagery, applying and comparing Decision Tree, Random Forest, and XGBoost models.

AWARDS & CERTIFICATIONS

Certificate of Completion — Fundamentals of Deep Learning 2026

NVIDIA Deep Learning Institute

- Completed NVIDIA's official deep learning certification covering neural networks, CNNs, and GPU-accelerated training.

Certificate of Completion — AI Bootcamp (104 hours, 13 days) 2026

AI Intensive Bootcamp

- Completed an intensive 104-hour, 13-day AI bootcamp covering machine learning, deep learning, and multi-agent systems.

Best Member Award — Learning AI 2026

Club devup

- Recognized as Best Member for outstanding contributions to AI learning initiatives and knowledge sharing within the team.

Deep Learning & Multi-Agent Bootcamp — Competition Winner 2026

Bootcamp Competition

- Won the internal bootcamp competition by delivering the best AI solution among all participating teams.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript / TypeScript
AI & ML:	Deep Learning (CNN, NLP), SVM, ANN, Scikit-learn, TensorFlow
Multi-Agent Systems:	LangChain, LangGraph, Multi-Agent Orchestration
Web & Mobile:	HTML, CSS, React, Next.js, Django, Android (Java)
Tools & DevOps:	Git, Nextcloud, Database Design, Security Best Practices
Soft Skills:	Project Management, Mentoring, Team Leadership, Event Organization, Problem Solving
Languages (spoken):	Arabic (Native), English (Fluent), French (Fluent)
